# WEI Communication Improvement Update

Prepared by Devrie Sanghera

21 April 2021

# Communications Improvement Focal Points

# Flow Facts Improvements

Additional improvements to Flow Facts have been identified, and will include:

- ✓ additional historical data on the Flow Facts website; and,
- ✓ increased advertising in the community outlining that the information supporting Flow Facts can be obtained at any time from the Get Involved Nechako website.

Additionally, Rio Tinto is investigating:

- ⊙ automated Flow Facts updates; and,
- ⊙ automated flow projections.

Implementation timeframe:

- ✓ The Flow Facts improvements identified above are or will be made immediately.
- ↻ Rio Tinto has committed to continual improvement with Flow Facts based on ongoing feedback.

## Current Conditions - 15 April 2021

### Nechako Reservoir operations update

- Skins Lake Spillway discharge is maintained at 200 m<sup>3</sup>/s in anticipation of Spring freshet.
- Based on current conditions there is a 90% probability that the Nechako Reservoir will not fill completely in 2021
- For real time information and updates visit [getinvolvednechako.ca](https://getinvolvednechako.ca)
- To subscribe to weekly updates email us at [nechakoreservoirupdates@riotinto.com](mailto:nechakoreservoirupdates@riotinto.com)

### Reporting Period: 9 April to 15 April 2021

- Reservoir level has **decreased** from 2794.02 feet to 2793.50 in the past 7 days.
- Skins Lake Spillway is being **maintained** at 200 m<sup>3</sup>/s in anticipation of Spring freshet.
- Nechako River flow discharge at various locations are as follows:
  - Flow at Nautley is currently 21 m<sup>3</sup>/s
  - Flow at Vanderhoof is currently 204 m<sup>3</sup>/s
  - Flow at Cheslatta Falls is currently 174 m<sup>3</sup>/s
- Seven (7) mm of precipitation was observed last week and one (1) mm of precipitation is expected for next week.
- Based on current conditions, there is a 90% chance that the Nechako Reservoir will not fill completely in 2021.
- Real-time and historical information on reservoir activity, can be viewed at any time by clicking [here](#).

# Flood Emergency Planning

- Engage with necessary parties to create a working group
- Identify what is working and the areas for opportunities
- Create a trigger action response plan

# Team Member Awareness and Communication Efficiency
