

**To:** WEI Technical Working Group members  
**From:** Jayson Kurtz, TWG Coordinator, Ecofish  
**Date:** June 23, 2021  
**Re:** Summary of TWG meeting held Wednesday, June 23, 2021, 9:00 am to 12:00 am

---

Attendees:

- Dan Sneep (DFO)
- Andy Lecuyer (RT)
- Duncan McColl (FLNRORD)
- Rahul Ray (EDI)
- Jayson Kurtz (Ecofish Research Ltd.)
- Jennifer Carter (Ecofish Research Ltd.)

Meeting Objective: discuss PMs for the next MT meeting and brainstorm remaining interests.

Agenda:

- Review results of issues scoping.
- TWG discussion on issues ready to be refined.
- Discussion on PMs for the next MT meeting.

Updates:

- Michael Harstone will be working with the MT through the structured decision making (SDM) process
- Clyde Mitchell, who helped create the Nechako temperature model, will be modeling water temperature assuming no STMP flow
- SDM scenarios presented last MT meeting are currently being calculated and a consequence table will be ready to present at the next MT meeting
- Bathymetric/lidar data collection on the Nechako River will be starting, as soon as early July. This data will provide more detail to develop and model PMs.

Meeting summary:

- Review of issues scoping and refine draft PMs. To be continued at next meeting.
